

Hose & Hose Tracking for the Downstream Market

JGB combines products and services for the Refinery/Petrochemical industry allowing us to provide custom solutions for all your hose and fitting needs. We offer a *complete* line of hose, valves & fittings along with the JGB Hose Tracking System.

- JGB's *Hose Tracking System (HTS)* helps manage hose assembly maintenance
- uses secure database technology for 24/7 on-demand information about assemblies
- permanent asset labels on each assembly
- labels can be fully customized
- can be scanned by any internet connected mobile device using JGB's free mobile app

The Assembly Identification Label

HTS allows JGB to affix permanent asset labels to each assembly that presents critical, product-specific information that correlates to the digital record that is stored in the online customer portal. The asset label provides users in the field all of the necessary information needed to identify the assembly. If required your assembly label can be equipped with a custom QR code which can be scanned with a connected mobile device. Once scanned the user will be directed to that specific assembly's digital record, allowing him/her to view all critical details including the **ability to download test certificates directly to their device.**

Each tag can be fully customized to contain specific information. Customizing labels makes assembly identification quicker, reducing any downtime. JGB can customize your tag right down to including your logo!

Built in scanner (Android Users)

*NOTE: Apple users simply scan the assembly label with your camera.

The JGB Mobile Application

The all new JGB Enterprises free mobile application allows users a "one touch" option to access the HTS portal, making it the ideal worksite assistant. It allows users to scan an assembly, and/or log into the customer HTS portal from any internet connected mobile device, making it a great tool for those in the field. The built-in scanner allows for easy label scanning and access to specific assembly data, including test certificates. The application also has a built-in log in screen which allows the user to log into the portal right from the app, no need to navigate via a browser to log in.

The JGB app Home Screen allows easy navigation to the login screen and Assembly Scanner.
